DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: , the controller, the scanning device or structure, the ink nozzles of respective colors. Further, the clause "wherein...pixel area." does not constitute a limitation of the claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-17, 20-24 are rejected under 35 U.S.C. § 102(e) as being anticipated by Iwazawa. (JP 0045351)

Iwazawa (see constitution) discloses every element of the instant claimed includes printing wherein ink nozzles of respective colors are symmetrically arranged and delivered in the same order in the forward and reverse directions so that to eliminate a tone difference. (see also purpose)

Art Unit: 2861

The remaining claimed features and method are deemed to be clearly anticipated by Iwazawa.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwazawa.

Iwazawa teaches the instant claimed subject matter except for applying the apparatus in a copy machine and a facsimile machine.

However, it would be obvious to use the apparatus such as the ink jet printhead as taught by Iwazawa in the copy machine and the facsimile machine since it is widely known to apply ink jet structure as a whole in the copy machine and the facsimile machine so that ink jet application can be provided.
